1. As a game player, I want to access a tutorial or instruction of the game rules, so that I can learn how to play the game if I am rookie.

2. As a game player, I want to have a rank system, so that I can upgrade if I win, otherwise I will be reduced to a lower rank.

3. As a game player, I want to save my progress in the game, so that I can continue my game at a later time.

4. As a game player, I want to adjust the difficulty skill level of the game, such as beginner, intermediate and high-level, so that I can play against opponents of varying skill level.

5. As a game player, I want to have hints to highlight the position in which I can place my pieces, so that I can analyse the situation on the board quickly.

6. As a game player, I want the game to have an AI opponent, so that I can play with AI if I want to practise.

7. As a game player, I want the game to have an AI opponent with different levels, so that I can adjust the AI's level and play with different levels of the AI player.

8. As a game player, I want to prevent players from forming illegal diagonal mills, so that the game can be played fairly.

9. As a game player, I want to be able to roll the dice, so that the dice's points can decide which player can place their pieces first.

10. As a game player, I want the game to have a counter, so that I can know from the counter about how many pieces I have remaining.
